

"Green Entrepreneurship Intention Among High School Students"

The link: <https://www.frontiersin.org/journals/education/articles/10.3389/feduc.2023.1225819/full>

SHORT DESCRIPTION

A study evaluating factors that influence green entrepreneurship intentions among high school students from teachers' perspectives.

Ricardo Perez-Lulyo et al.

SUGGESTIONS

Use this research article to strengthen workshop design by focusing on what boosts students' interest in green entrepreneurship. Add simple reflection questions after each phase to help students build confidence and see their progress. Include short team-based challenges that give them a sense of achievement—this supports the self-efficacy the study highlights. Encourage supportive group roles and peer feedback, which help young people feel more capable and motivated.
