SHORT DESCRIPTION

This course material introduces key ideas on how digital innovation can support more sustainable and inclusive urban development. It provides clear concepts, real-life examples, and practical activities that encourage discussion on how cities can become more accessible, equitable, and sustainable.

Escape Rooms for Green Entrepreneurship

Co-funded by the European Union

This project has been funded with support from the European Commission. This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

SUGGESTIONS

This resource could be implemented with learners engaging in a discussion about their own city and its level of inclusiveness and sustainability. Then, followed by the analysis of real-life case studies from the guide. The content can also be put into practice through role-playing exercises, group mapping of a “future city,” and problem-solving activities focused on urban challenges such as mobility, pollution, or inequality. Finally, trainers can encourage reflection on how digital innovation can contribute to more inclusive and sustainable cities in everyday life (again providing concrete examples).

KEY WORDS

- Sustainability
- Environmental challenges
- Social Impact
- Education

LANGUAGES

English.

PRICING

The resource is available freely.
