

Cirkulær økonomi - en bæredygtig fremtid

The link: <https://www.dn.dk/vi-arbejder-for/baeredygtighed/cirkulaer-okonomi/>

SHORT DESCRIPTION

The page describes Denmark's move from a linear to a circular economy, focusing on reuse, repair, and recycling to cut waste and emissions. It highlights the need for durable design, sharing, and leasing to build a more sustainable economy.

SUGGESTIONS

Interactive Workshop or Classroom Activity

Objective: Understand the difference between linear and circular economy.

Method: Use product life cycle diagrams. Let students redesign a common product (e.g., a t-shirt or smartphone) to fit a circular model. Discuss how materials could be reused, shared, or recycled.

KEY WORDS

- Green business
- Environmental challenges
- Sustainability
- Business strategies
- Green Economy
