SHORT DESCRIPTION

Interactive exhibition focusing on daily ecological practices.

SUGGESTIONS

Use the online content to create a virtual learning experience. Direct students to explore the exhibition's website or media coverage, then assign tasks like a digital scavenger hunt or mini-presentation on one exhibit topic. Students can also write short responses on what exhibit inspired them most or how it connects to their start-up idea. If some participants are local, invite them to share their visit through photos or a short report to enrich group discussion.

KEY WORDS

- Gamification
- Environmental challenges
- Eco friendly
- Sustainability
