SUGGESTIONS

Use the teaching toolkit to strengthen youth activities by aligning them with clear sustainability learning outcomes. Incorporate the toolkit's guidance into role-specific tasks, e.g., the environmental scientist analyzes trade-offs, while the policy maker explores systemic impacts. Use a mapping exercise to help teams connect their business ideas to global goals. Draw on the toolkit's suggestions to design reflective prompts and rubrics. It's also useful for educators preparing to integrate sustainability themes more deeply across subjects.
