INR Institut du Numérique Responsable

SHORT DESCRIPTION

The Sustainable IT MOOC is an online training program designed to raise awareness and educate a wide audience about the environmental and social impacts of digital technology. It includes two free modules: Awareness MOOC (a short introduction to the basics of Sustainable IT for all) and Full MOOC (a more in-depth course).

SUGGESTIONS

Young people could go beyond just completing the MOOC. They could turn what they learn into action, awareness, and change in their schools, communities, or online environments.

After completing the MOOC, gather a group of classmates interested in sustainability and/or technology, discuss together and decide on a shared goal, then use what you've learned to reach that goal and make changes within your school/organization.

KEY WORDS

- Green Business
- Sustainability
- Business strategies
